

## Valued partner and project management excellence

Highly satisfactory and agile approach towards project management and software development! Thorough understanding of our business goals and the execution of strategic objectives! I am very impressed with our offshore development team specialising in Microsoft Dynamics CRM and .Net.

Aegis do not only provides quality code but also creative business solutions that are results driven. They never “Just Accept” what we explain to them but also investigate and suggests alternative ways to solve complex business problems. It makes us confident in the projects we take on board, knowing that the team can deliver.

Aegis is our trusted and valued partner for a number of years now and all the solutions we implement are developed by Aegis only. We are using four dedicated Microsoft Dynamics CRM and .NET resources with Aegis. I would highly recommend Aegis for offshore software development and IT project services.

Thank you guys for such wonderful technical guidance and support! I truly appreciate your involvement in our business.
